Nicolas Diaz
Letter of Recommendation

To whom it may concern:

I have known Nicolas Diaz since August 2004 when he worked for George Moreno Architects. I was impressed with his design and autocad skills and invited him to join Pillar Construction when he was available. He joined Pillar Construction in January 2005 to become the head architect and designer. His dedication to represent the ideas of design and architecture from the development team, sales teams and to the design-consultants of other firms has lead to many solutions to the challenges of the Red Frog Beach project.

Nick has been the backbone of architectural and engineering design and coordination effort to place the construction team in a measurable time frame to succeed. He is seen as the "go to guy" to transmit information and collect information critical to the controls needed in project of this complexity. He has adapted to the changes thrown at him and has been the leader of the group to push the work forward to completion. He has great strengths in teamwork, speed, organization skills and design solutions.

He shown himself as a leader and manager as he lead a team of architects and engineers. His long hours, patience and design skills to solve problems and has helped this construction project to move forward in a coordinated manner.

Nicolas personality is delightful. He is sensitive, flexible, respected and admired by peers, subordinates and superiors alike. I am deeply impressed by Nicholas and recommend him unhesitatingly. I am confident that, if selected for your vacancy, he would provide the same high level of service and commitment

A handwritten signature in black ink, appearing to read "Dennis Steers", with a stylized, flowing script.
